

of said body further including a plurality of openings adjacent the razor cartridge receiving area and in communication with said storage reservoir; and

Claim 11
a pedestal disposed within said storage reservoir of said body, wherein said pedestal is selectively movable between the lower and upper ends of said body for dispensing the fluid shaving preparation through said plurality of openings at the upper end of said body.

Claim 4

Claim 12
4. (Amended) The shaving assembly as claimed in claim 3, further including one or more plurality of openings at the upper end of said body disposed within said razor cartridge receiving area.

Claim 32

32. (Amended) A shaving assembly comprising:
Claim 13
a handle having an upper end, a lower end and a substantially enclosed storage reservoir between the upper and lower ends, said storage reservoir being for holding a fluid shaving preparation;

the upper end of said handle having a razor cartridge receiving area for having one or more razor cartridges attached thereto, the upper end of said handle further including a plurality of openings adjacent the razor cartridge receiving area and in communication with said storage reservoir; and

a pedestal disposed within said storage reservoir and movable toward the upper end of said handle for urging the fluid shaving preparation through said plurality of openings.

Claim 36

6/14 36. (Amended) The shaving assembly as claimed in claim 32, further including one or more plurality of openings disposed within the razor cartridge receiving area at the upper end of said handle.

Claim 45

6/15 45. (Amended) A lubricating shaving assembly comprising:
a dispenser having an upper end, a lower end, and side walls extending between the upper and lower ends, said dispenser including a storage reservoir for holding a fluid shaving preparation;
a cap removably secured to the upper end of said dispenser, wherein said storage reservoir is surrounded by the lower end and side walls of said dispenser and said cap;
an upper end of said cap having a razor cartridge receiving area for having one or more razor cartridges secured within the receiving area, the upper end of said cap further including a plurality of apertures adjacent the razor cartridge receiving area and in communication with said storage reservoir; and
a pedestal disposed within said storage reservoir of said dispenser, wherein said pedestal is selectively movable toward said cap for dispensing fluid shaving preparation through said plurality of apertures at the upper end of said body.

Claim 47

6/16 47. (Amended) The shaving assembly as claimed in claim 45, further including at least one aperture at the upper end of said cap underlying the one or more razor cartridges secured within the razor cartridge receiving area for allowing said fluid shaving preparation to flow around said razor cartridges.
